Date of birth: 04 March 2004

Gender: Male

Address: Chrouy Chongva, OCIC Street,
Phnom Penh

ABOUT ME

I am a recent graduate of the Institute of Technology of Cambodia with a degree in Information and Communication Engineering, seeking a full-time Frontend Developer role. I build responsive, user-friendly web interfaces with Vue.js and Nuxt.js, with a focus on thoughtful UI design and reliable API integration. Through e-commerce and customs AI chatbot projects, I have gained practical experience creating clear digital experiences for complex workflows. I am eager to contribute to government or fintech products while continuing to grow with a collaborative development team.

EDUCATION

Institute of Technology of Cambodia	2021 - 2026
Bachelor of Information and Communication Engineering	
Koh Kong High School	2019 - 2021
High School Diploma (Grade 12)	

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, Java, Dart
- Backend & Frontend**
 - Backend:** Laravel, REST API Integration, OpenAPI / Swagger Documentation
 - Frontend:** HTML, CSS, Vue.js, Nuxt.js, Pinia, Tailwind CSS, Vuetify, ECharts, Server-Sent Events (SSE)
- Mobile Development:** Flutter
- Relevant Technologies:** Git, Docker, Figma

PROFESSIONAL EXPERIENCE

Customs Artificial Intelligent Assistant	March 2026 - Present
General Department of Customs and Excise of Cambodia	

- Develop and deploy a responsive Nuxt 4 and Vue 3 chatbot platform for Cambodian customs, supporting HS-code lookup, duty calculation, trade-data queries, and general information.
- Build authentication, navigation, shared-chat, feedback, responsive, and English/Khmer UI features with TypeScript, Pinia, Vuetify, and Tailwind CSS.
- Implement SSE streaming and reusable renderers for Markdown, tables, ECharts charts, links, citations, and clarification questions; integrate existing API gateway and AI services, support stakeholder deployment and end-to-end testing with locally run backend services, and refine the UI.

Motion Cycles E-Commerce	July 2025 - October 2025
Institute of Technology of Cambodia	

- Developed a full-stack e-commerce platform for bike sales using Laravel backend and Vue.js frontend, with user authentication, product catalog, and order processing.
- Implemented features like shopping cart, favorites, product reviews, discounts, and secure KHQR payments via Bakong API, and an admin panel to manage products, orders, users, and payments.
- Improved backend operations, structured RESTful APIs, and applied modern design with Tailwind CSS for smooth management and user experience.

RELEVANT PROJECTS

GPS Tracking System

July 2025 - October 2025

Internship at Mango Finance PLC

- Developed a Django backend for a GPS tracking system with real-time data retrieval and API endpoints for device monitoring.
- Improved database operations and data processing, integrated with Nuxt.js, and prepared technical documentation for smooth deployment.

Carbodia E-Commerce

January 2025 - June 2025

Institute of Technology of Cambodia

- Developed a full-stack car e-commerce platform using Vue.js 3, Vite, and PocketBase for real-time data, user authentication, and CRUD operations.
- Implemented car browsing with filters, interactive galleries, bookmarking, and a multi-step checkout with reservation, customer details, and deposit confirmation using Pinia, Vue Router, Vee-Validate, GSAP, and Iconify.

LED Textboard

May 2024 - June 2024

Institute of Technology of Cambodia

- Developed an interactive LED text display web app using HTML5 Canvas with real-time rendering, customizable colors, fonts, and sizes, and a theme system with 12+ styles.
- Implemented text animations (scroll, float), effects (wobble, 3D, flame, blink), background animations (rectangles, flow field, fireworks), and responsive UI controls for seamless user customization.
